Dear Sir/Madam;

**Re: Confirmation of Trojan Override
Coupling 201678 NZ 2500kg rating**

Trojan Override Coupling 201678 meets the requirements of Australian Standard AS4177.3-2004 for a rating of 2000kg, but has been successfully load tested to 3500kg test loads in accordance with AS4177.3-2004 appendix A at a NATA accredited laboratory. These test loads exceed the equivalent NZS5232:1993 test loads for a 2500kg Coupling rating (test loads interpolated from 2000kg and 3500kg test loads specified in NZS5232:1993 Table 1).

This coupling is suitable for use in New Zealand on trailers (up to a rating of 2500kg) provided that the trailer and installation are in compliance with NZ Transport Agency Land Transport Rules.

Please do not hesitate to contact me should you have any questions or require any additional information.

Yours Respectfully,

Douglas Studer
Director of Engineering
